

REACH Letter

Speed up your REACH Information Request Processes

The new iPoint Compliance Agent (iPCA) REACH Letter module supports you in fulfilling the legal requirements of the European chemicals regulation REACH, Article 33, according to the European Court of Justice's judgment of 2015, by the click of a mouse.

Challenges

Article 33 of REACH contains a 'right to know' provision, where consumers can ask manufacturers if their product contains any substances currently listed by the European Chemicals Agency ECHA as a Substance of Very High Concern (SVHC) and how to use the product safely (safe use instructions). Once an end consumer has sent an information request, suppliers have a legal obligation to provide the information within 45 days and free of charge.

Several smartphone apps now make it easy for consumers to request information about SVHCs and safe use by simply scanning a product's barcode. This new option has significantly increased the number of such product information requests for companies.

Solution

The iPCA REACH Letter module enables you to create a REACH Letter or REACH certificate as required by REACH Article 33 from the manufacturer (who puts the product on the market) from different iPCA modules like Parts Inventory or Virtual Product Models.

Furthermore, the module assists you with a flexible management of templates for REACH and provides multi-language support. In addition, the REACH Letter module can be extended to include Safe Use Information, allowing users to import a file with evaluations of products and include them in the REACH letter as special chapter.

Use the iPCA REACH Letter module to speed up your customer and consumer responses: Simply create a REACH Letter using existing SVHC data from your systems, add Safe Use Information and respond to the customer request.

BENEFITS of the iPoint REACH Letter Module

- ➔ Quickly collect existing product and supplier data from your internal systems
- ➔ Create a REACH Letter in .DOC format to add further information
- ➔ Create a REACH Letter in .PDF format to send to the requesting party
- ➔ Add pre-defined Safe Use Information to include in the response if necessary
- ➔ Choose recipients from existing contacts in iPCA or simply add new recipients in the REACH Letter menu
- ➔ Respond directly to the customer / consumer request or forward the REACH Letter to persons responsible

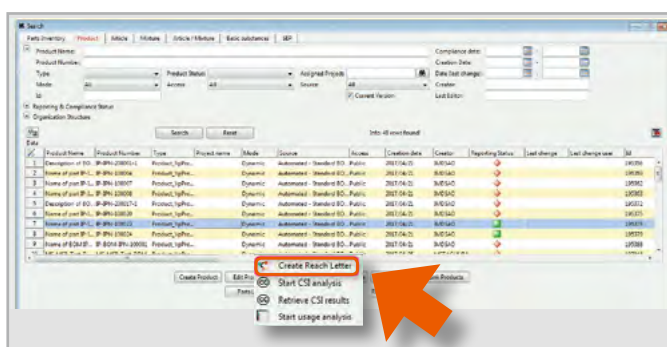

iPoint

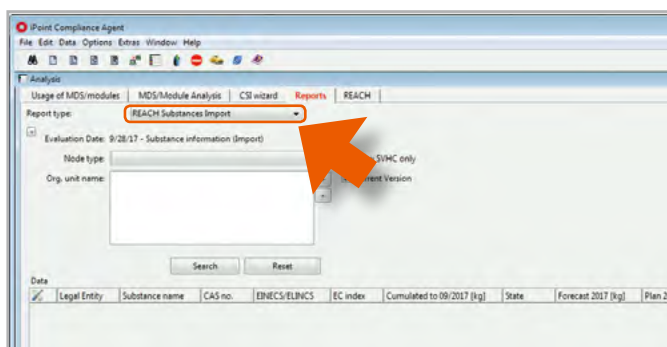

iPOINT COMPLIANCE AGENT

REACH Letter Answer REACH Information Requests by the Click of a Mouse

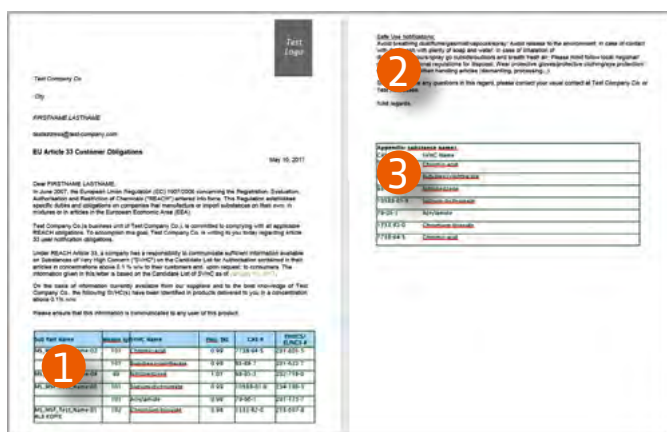

With iPoint's REACH Letter module, you can quickly create reports according to the requirements of REACH Article 33 – using the data already present in your systems. The REACH Letter module is available for both versions of the iPoint Compliance Agent, iPCA IMDS for the Automotive industry as well as iPCA SAM-M for all other industries.

Starting the REACH Letter Module from Virtual Product Model.

Import REACH substances information for the selected product.

Example for an automatically generated REACH Letter including SVHC information (1) and appendix (3) as well as Safe Use Information (2).

FEATURES & FUNCTIONS

iPCA REACH Letter SAM-M

- Precondition:
 - iPCA SAM-M
- Create a REACH letter as required by REACH article 33:
 - For SAM-M data
- From Reports:
 - For SAM-M datasheet
- From Parts Inventory *
- From Virtual Product Model *
- Flexible management of templates for REACH Letter
- Multi language support

iPCA REACH Letter IMDS

- iPCA IMDS
- For IMDS data
- For IMDS datasheet

iPCA Safe Use Instructions for REACH Letter

- Precondition:
 - iPCA REACH Letter SAM-M
 - iPCA REACH Letter IMDS
- This is an extension to the REACH Letter functions
- Allows you to import a file with evaluations to products
- These evaluations will be included in the REACH Letter as special chapter

* = if licensed
